v1 = Version 1 - The documents may be updated to version 2 or higher as required, which will be announced via Implementation News.

The communication calendar reflects the planning for the publication of the T7 Release 13.1 documentation. Up to three versions for some documents (e.g. interface specifications) are foreseen of which two are considered to be optional (i.e.) will not be published if there have been no changes since the previous version. In exceptional circumstances however, more than three versions of a particular document could be published and these would be announced separately.

The documents will be made available on the Eurex website www.eurex.com under the path:

Support > Initiatives & Releases > T7 Release 13.1 > System Documentation

Please note that dates are preliminary and subject to change.
