## Abstract

This guide offers concise instructions for using the GUI for Short Code ID and Algo ID registration and maintenance submissions. It covers login, file submission, manual entries via eForm and status monitoring. In addition, report download and management of missings, final missings and upload errors are provided.

## History

---

Version	Date	Reason
1.0	30.10.2023	Introducing the GUI and functionalities
1.1	01.12.2023	Update chapter 2.1 and 2.2 (Access right change of name)
1.2	13.06.2024	Restructuring chapter 4.2, introduction chapter 4.3 covering the new eForm for manual submission of Short Code IDs and Algo IDs
1.3	14.10.2024	Update chapter 4 with screenshots of the adapted GUI (Release 13 changes), added new chapters 4.2, 4.5, 4.6, 4.7 covering the report download and missing, final missing and upload error display and management. Chapter 6 covers an additional support function.

## 1 Introduction

This user guide is designed to help trading participants navigate and use the Short Code ID and Algo ID upload GUI (“GUI”) effectively. The next section delves into the setup of user accounts and their prerequisites. The third chapter focuses on the visualization of GUI access, while the fourth chapter provides a comprehensive overview of the field descriptions and the functionality for the file upload and manual submission via eForm of Short Code IDs and Algo IDs as well as the management of missing(s), final missing(s) and upload error(s). The fifth chapter provides information about the cut-off time and service availability. The sixth and seventh chapters provide contacts and links for support related matters.

Detailed explanation of the regulatory requirements and implemented solution can be found under the following paths:

- Xetra.com > Newsroom > Current regulatory topics > MiFID II and MiFIR > Reference data reporting
- Eurex.com > Rules & Regs > MiFID II / MiFIR > Client & member reference data

## 2 Account setup and technical prerequisites

### 2.1 Prerequisites

The user must ensure that the following technical prerequisites are met before accessing the GUI:

1. Member Section active user account with the necessary rights granted for:
  - GUI – Upload Short Code ID and / or
  - GUI – Upload Algo ID
2. Common Upload Engine (CUE) user setup

If both prerequisites are fulfilled already, please go to chapter 3.

### 2.2 Account activation and setup

Required users and respective rights shall be set up in order to meet the prerequisites.

1. Member Section: Please request the required user rights under the following path, which must be approved by the central coordinator:
  - membersection.deutsche-boerse.com > My Profile > Permissions

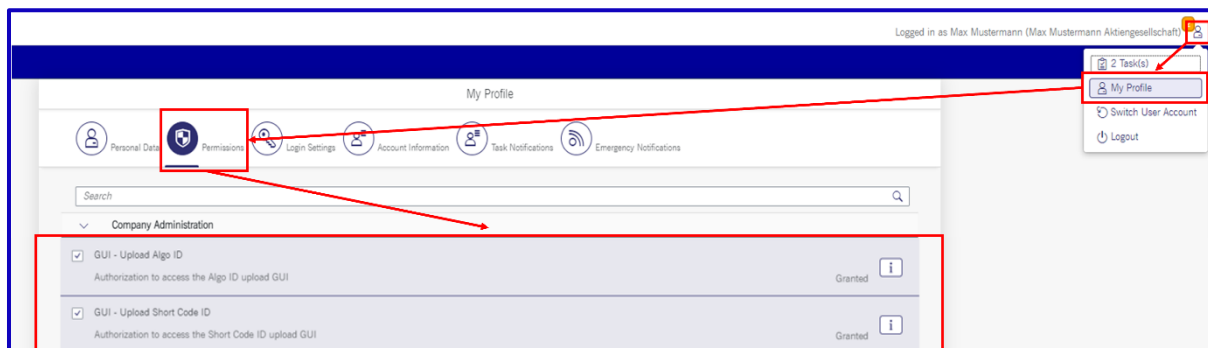

Figure 1: Member Section account setup

2. CUE: Please set up the CUE user following the instructions of the “Common Report & Upload Engine User Guide”, which can be found under the following paths:
  - Xetra.com > Technology > T7 trading architecture > System documentation > Most recent release > Reports
  - Eurex.com > Support > Technology > Common Report Engine (CRE)

### 3 Accessing the GUI

Please access the GUI by following the path via the Member Section:

- membersection.deutsche-boerse.com > Company Administration > Short Code ID / Algo ID Upload GUI

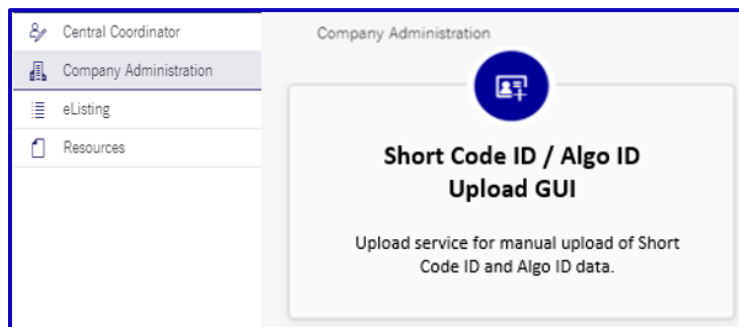

Figure 2: Accessing the GUI

Please find the direct link to the GUI below:

Figure 3: Link to GUI

If all technical prerequisites are set up and all permissions are granted, the GUI can be accessed directly via the following link:

- <https://e-listing.deutsche-boerse.com/e-listing/ext?sclc>
-

## 4 GUI Interface

Please find the GUI below:

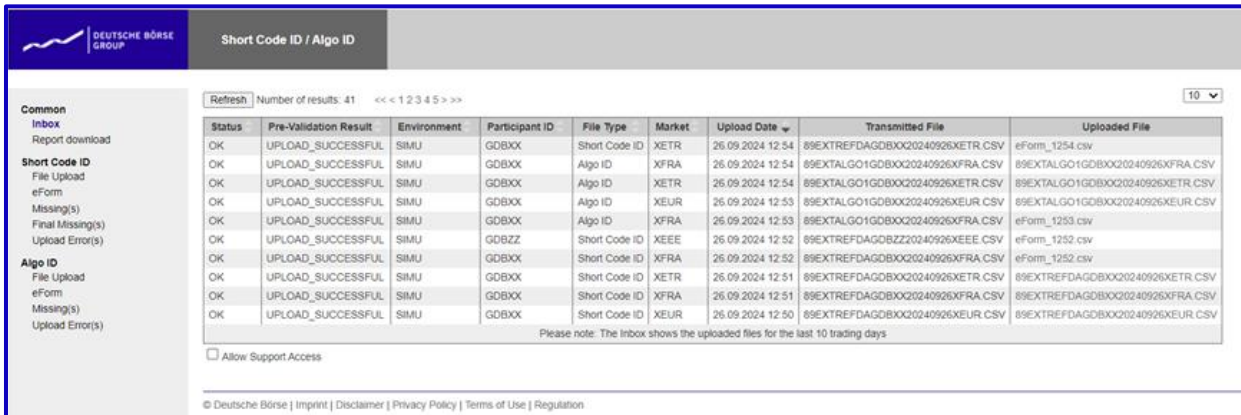

Figure 4: GUI Interface

The GUI provides various functionalities to control the session, which can be found in the top righthand corner of the screen:

Figure 5: Control functions

### Session control functions

- **Language Selection:** Option to switch between English and German.
- **Login Information:** The currently logged-in username.
- **Help:** Important user information and guides for assistance.
- **Logout:** Logout button to end the GUI session securely and prevent unauthorized access. An automatic log-out is performed after 6 hours of inactivity.
- **Date Display:** The current date/time.

Dedicated tabs for Short Code ID and Algo ID management are located on the left side of the interface, which offer specific features:

Figure 6: Short Code ID and Algo ID upload GUI features

### Short Code ID and Algo ID upload GUI Features

- **Inbox:** List of upload files, which are currently being processed and historical uploads from the last 10 trading days. It allows the monitoring of ongoing uploads and the view of completed ones.
- **Report download:** TR160-169 reports are available for download. The end of day (EOD) reports of the past 10 trading days and the intraday reports of trading day t-1 and t are provided.
- **File upload Short Code ID / Algo ID:** Submission of Short Code ID / Algo ID upload files.
- **eForm Short Code ID / Algo ID:** Manual submission of Short Code ID data / Algo ID data.
- **Missing(s) - Short Code ID / Algo ID:** Missing Short Code IDs / Algo IDs of the most recent TR160 / TR162 EOD report and the current intraday report are provided.
- **Final Missing(s) - Short Code ID:** Final Missing Short Code IDs of the most recent TR169 EOD report are provided.
- **Upload Error(s) - Short Code ID / Algo ID:** Upload Error(s) of Short Code IDs / Algo IDs of the most recent TR160 / TR162 EOD report and the current intraday report are provided.

## 4.1 Inbox

The inbox provides an overview about successfully submitted entries via eForm, from which an upload file is created by the GUI, uploaded files submitted by the user, rejected files and corresponding feedback files (CUE log files) covering the error(s) of the failed pre-validation and the respective status. Historical uploads of the last 10 trading days are available. The files can be downloaded. This enables upload monitoring and potentially immediate reaction in case of failed pre-validation.

Please find information about the applied pre-validations in the “CUE validation and file specification Short Code and Algo ID” document under the following paths:

- Xetra.com > Newsroom > Current regulatory topics > MiFID II and MiFIR > Reference data reporting
- Eurex.com > Rules & Regs > MiFID II / MiFIR > Client & member reference data

Status	Pre-Validation Result	Environment	Participant ID	File Type	Market	Upload Date	Transmitted File	Uploaded File

Please note: The inbox shows the uploaded files for the last 10 trading days

Figure 7: Inbox

- **Status:** The GUI transfers uploaded files and files resulting from entries in the eForm to the CUE for pre-validation. The possible statuses in the inbox are:
  1. **In Queue:** Initial status directly after uploading the file. The file is awaiting a response from the CUE.
  2. **No Response:** The file transfer failed. Please contact the technical support. Please refer to chapter 6 “Contact”.
  3. **Failed:** Files with this status were rejected due to non-compliance of file type, file structure or file suffix. By clicking on the  button in the “Pre-Validation Result” column the feedback file (CUE log file) can be downloaded with detailed error information. By clicking on the  button in the “Pre-Validation Result” the information is displayed in the GUI. Please address validation related questions via email to the Regulatory Reporting Analysts at client.services@deutsche-boerse.com.

4. **OK:** Files were successfully pre-validated (either with no data record error and the CUE response “UPLOAD\_SUCCESSFUL” or with data record errors and the CUE response “UPLOAD\_SUCCESSFUL\_WITH\_ERRORS”) and transmitted to the comprehensive validation in the data warehouse. Final results are provided in the error and overview reports TR160 / TR161 for Short Code ID and in TR162 / TR163 for Algo ID registrations. The reports are available on CRE and in the GUI. However, since files will not be rejected due to erroneous data records in the file, the user can check the CUE pre-validation results by clicking on the  button in the “Pre-Validation Result” column. The feedback file (CUE log file) can be downloaded with detailed error information. By clicking on the  button in the “Pre-Validation Result” the information is displayed in the GUI. Please address validation related questions via email to the Regulatory Reporting Analysts at client.services@deutsche-boerse.com.

Status	Pre-Validation Result	Environment	Participant ID	File Type	Market	Upload Date	Transmitted File	Uploaded File
OK	UPLOAD_SUCCESSFUL_WITH_ERRORS  	SIMU	GOBXX	Short Code ID	XEUR	24.09.2024 10:37	89EXTREFDAGDBXX20240924XEUR.CSV	89EXTREFDAGDBXX20240709XEUR.CSV
OK	UPLOAD_SUCCESSFUL_WITH_ERRORS  	SIMU	GOBXX	Short Code ID	XEUR	24.09.2024 10:37	89EXTREFDAGDBXX20240924XEUR.CSV	89EXTREFDAGDBXX20240709XEUR.CSV

Figure 8: Validation Errors

- **Pre-Validation Result:** This column provides the information about failure or success of the upload file.
- **Environment:** Environment selected by the user in the upload / new record form. “SIMU” for the simulation environment and “PROD” for the production environment.
- **Participant ID:** Permitted participant ID (equals Member ID in the T7 environment) selected by the user in the upload / new record form.
- **File Type:** File type chosen by the user in the upload / new record form, i.e. Short Code ID or Algo ID.
- **Market:** The permitted MIC chosen by the user in the upload / new record form.
- **Upload Date:** This column provides the time and date of the file upload.
- **Transmitted File:** This column contains the final filename, which was transmitted to CUE.
- **Uploaded File:** This column contains the filename of the uploaded file or the file, which was created by the GUI with manual entries via eForm. Click the filename to download the file if needed.

## 4.2 Reports

In section “Report download” the Short Code ID EOD reports (TR160, TR161, TR166, TR167, TR168, TR169) and Algo ID EOD reports (TR162, TR163) of the last 10 trading days and in addition the TR160-TR163 intraday reports of reporting day t-1 and t are provided for download purposes. Production and simulation reports are offered. However, visibility and access to the reports is limited according to the GUI user rights.

Example report name TR160 EOD and intraday (10 AM), production environment:

90RPTTR160GDBXX20241118XEUR.XML.ZIP

90RPTTR160GDBXX202411181000XEUR.XML.ZIP

Example report name TR160 EOD and intraday (2 PM), simulation environment:

95RPTTR160GDBXX20241118XEUR.XML.ZIP

95RPTTR160GDBXX202411181400XEUR.XML.ZIP

A filter can be applied by clicking on the column names.

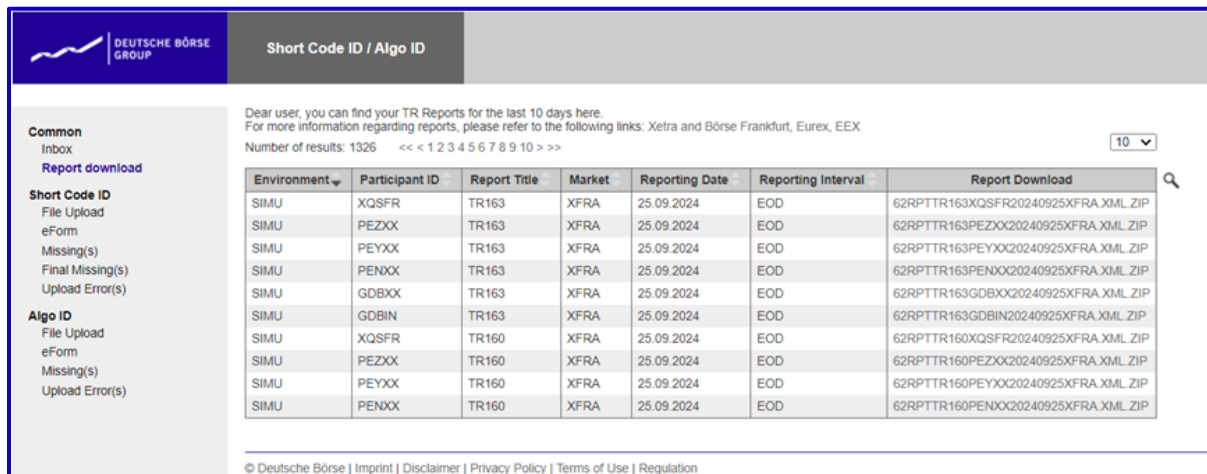

Figure 9: Report download

### 4.3 File upload Short Code ID and Algo ID

#### 4.3.1 File upload process

In the upload sections “Upload Short Code ID” and “Upload Algo ID” the user must fill mandatory fields in the file upload form:

- **Environment:** “SIMU” for the simulation environment and “PROD” for the production environment.
- **Market:** Available Market Identifier Codes (MIC) depend on member data and Participant ID admission.
- **Participant ID:** The Member ID(s) used by a trading participant in T7. Available Participant IDs depend on member data and Participant ID admission.

After the selection of the applicable field values, the system provides the correct filename according to the naming convention, if not already met by the user (please refer to chapter 4.3.2 for further details), and the upload file can be chosen:

Environment\*  
SIMU

Market\*  
XETR

Participant ID  
GDBXX

Required upload filename: 89EXTREFDAGDBXX20231018XETR.CSV  
Your document will be automatically renamed to adhere to the CUE naming convention.

Choose File No file chosen

Upload Short Code ID

[Link to documents Xetra and Börse Frankfurt, Eurex, EEX](#)

Figure 10: Upload Short Code ID

- Click on “Choose File” and select the file to upload.
- Click on “Upload Short Code ID” / “Upload Algo ID” to start the upload process.

- After initiating the upload, a notification about the success of the upload is provided within the upload form.

Figure 11: Upload Algo ID

For a comprehensive description of the file structure and field population, please refer to the “SCLC 2.0 - Reporting handbook for audit trail and other regulatory reporting under the MiFID II / MiFIR regime – Version 4.2”. Please find the link to the document in the “Link to documents” or under the following paths:

- Xetra.com > Newsroom > Current regulatory topics > MiFID II and MiFIR > Reference data reporting
- Eurex.com > Rules & Regs > MiFID II / MiFIR > Client & member reference data

#### 4.3.2 Naming convention

The system presents the naming convention of the filename, which is based on the selected values of the user. The GUI will provide the file name automatically, and if not used, will automatically rename the uploaded file. This standardized filename is utilized in all reports for the ease of monitoring purposes. It is strongly recommended to adhere to the naming convention already whilst preparing the upload file.

Please note that files uploaded on non-trading days will be processed within the next trading day’s report generation run which starts at 10 AM CE(S)T.<sup>1</sup>

Please note that the CUE is adding a timestamp (hhmmss) to the file name. In addition, CUE adds a version number (e.g. -V01, -V02) in case numerous files are uploaded per day.

Field name	Standard & Format
Environment ID	[88, 89]{2} 88 for Production 89 for Simulation
Service Name	[EXTREFDA, EXTALGO1]{8} EXTREFDA for SCLCs EXTALGO1 for Algo IDs
Participant ID	[A-Z] {5}
Upload Date	[0-9]{8} YYYYMMDD
Timestamp	[0-9]{6} hhmmss
MIC Code	[XETR, XFRA, XEUR, XEEE]{4} XETR for Xetra

<sup>1</sup> Please refer to the trading calendar for simulation and production for XETR and XFRA (simulation and production: <https://www.xetra.com/xetra-en/trading/trading-calendar-and-trading-hours>) as well as for XEUR (simulation: <https://www.eurex.com/ex-en/support/initiatives/simulation-calendar>; production: <https://www.eurex.com/ex-en/trade/trading-calendar>).

Field name	Standard & Format
	XFRA for Boerse Frankfurt XEUR for Eurex XEEE for EEX
Versioning	Optional field starting with -V01 up to -V99
File type	[.CSV]{4} .CSV

## 4.4 eForm Short Code ID and AlgoID

### 4.4.1 Submission process Short Code ID

#### 4.4.1.1 eForm data entry

In section “eForm Short Code ID” the user can fill in Short Code data with “Add new”:

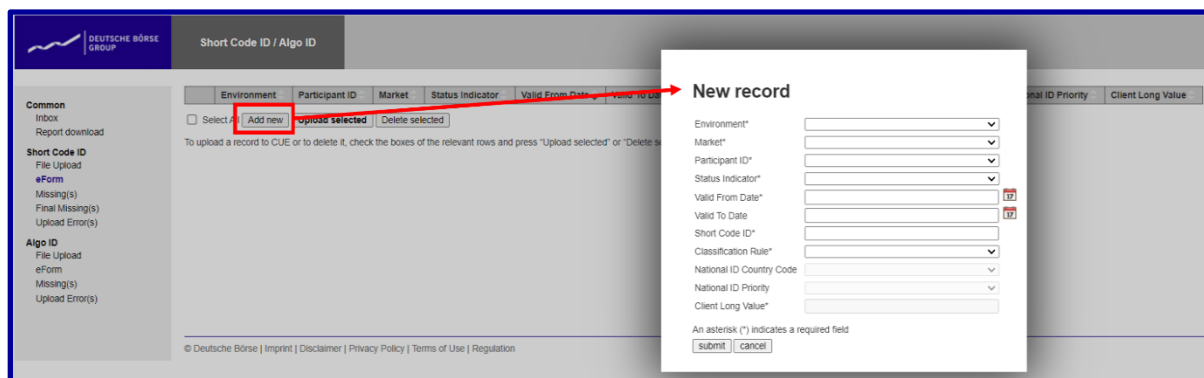

Figure 12: eForm Short Code ID - new record

- **Environment:** “SIMU” for the simulation environment and “PROD” for the production environment.
- **Market:** Available MIC codes depend on member data and Participant ID admission.
- **Participant ID:** Available Participant IDs depend on member data and Participant ID admission.
- **Status Indicator:** “N” for new registration, “M” for modification, “D” for deletion and “C” for Correction.
- **Valid From Date:** For status indicator “N” and “M” the Valid From Date can be t-1, t, t+1. For deletions only t+1 is available. For status indicator “C” the Valid From Date must be t-2 or older.
- **Valid To Date:** For status indicator “N”, “M” and “D” the Valid To Date must be empty. For status indicator “C” the Valid To Date must be t-2 or older.
- **Short Code ID:** A valid numerical Short Code ID must be added.
- **Classification Rule:** Available Classification Rules are “N” for National IDs of natural persons, “L” for LEIs of legal persons and “EMPTY” for the ESMA values “PNAL”, “AGGR”, “NORE”.
- **National ID Country Code:** Available Country Codes are those of ISO list 3166-1 alpha 2. If the Classification Rule is “EMPTY”, this field must be empty as well and is therefore disabled.
- **National ID Priority:** Available values “1”, “2” and “3” depend on the ESMA defined priorities.<sup>2</sup> If the Classification Rule is “EMPTY”, this field must be empty as well and is therefore disabled.

<sup>2</sup> ESMA table “National client identifiers for natural persons” (ESMA Questions and Answers on MiFIR data reporting, 25 May 2018 ESMA70-1861941480-56)

- **Client Long Value:** A valid Long Code must be added. If the Classification Rule, National ID Country Code and National ID Priority are “EMPTY”, then only the values “PNAL”, “AGGR”, or “NORE” are permitted from the drop-down menu.

For a comprehensive description of data structure and field population, please refer to the “SCLC 2.0 - Reporting handbook for audit trail and other regulatory reporting under the MiFID II / MiFIR regime – Version 4.2”. Please find the link to the document in the “Link to documents” or under the following paths:

- Xetra.com > Newsroom > Current regulatory topics > MiFID II and MiFIR > Reference data reporting
- Eurex.com > Rules & Regs > MiFID II / MiFIR > Client & member reference data

Once the data record is complete the user clicks on “Submit” and the data is pre-validated.

#### Failed validation

Failed data validation is displayed in the “new record form” and marked red.

**New record**

Environment*	SIMU
Market*	
Participant ID*	
Status Indicator*	N - New registration
Valid From Date*	26.09.2024
Valid To Date	17.09.2024
Short Code ID*	4545
Classification Rule*	Empty - ESMA value
National ID Country Code	
National ID Priority	
Client Long Value*	PNAL

An asterisk (\*) indicates a required field

'Market' is required.  
'Participant ID' is required.  
Invalid value in field Valid To Date

Figure 13: eForm Short Code ID - failed validation

**Successful validation**

Successfully pre-validated data records are displayed and can also be modified if needed. Please note that the data is not submitted yet. Please refer to chapter 4.4.1.4 for more information.

Figure 14: eForm Short Code ID - successful validation

**4.4.1.2 eForm modification of data entries**

In order to modify a data record, the user clicks on “Modify” and an “Edit record” window opens. The modification can be conducted. The data record can be submitted or the modification can be cancelled.

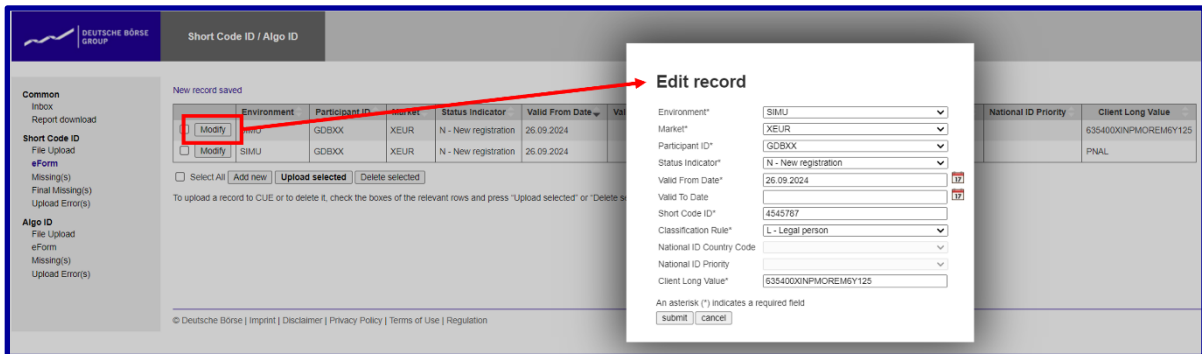

Figure 15: eForm Short Code ID - modification

**4.4.1.3 eForm deletion of data entries**

In order to delete a data record, the user selects the data record and clicks on “Delete selected” and a window opens for confirmation. The deletion can be conducted or cancelled.

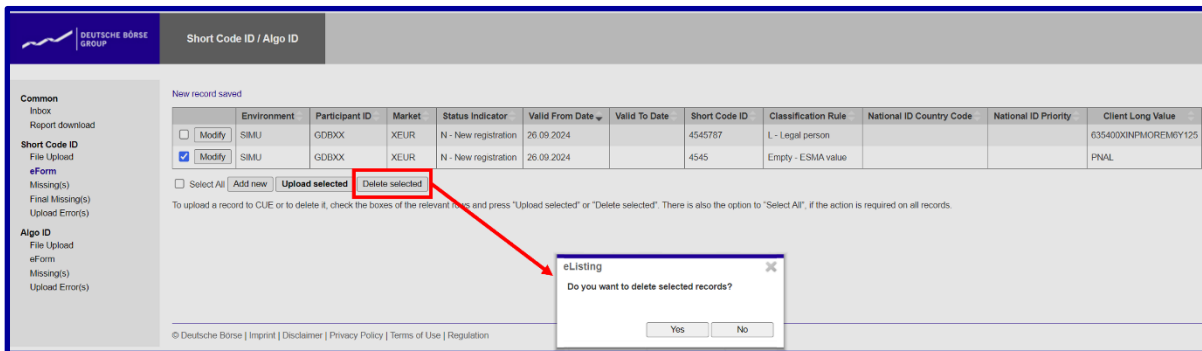

Figure 16: eForm Short Code ID - deletion

**4.4.1.4 eForm data submission**

In order to submit the data to the trading venue, the user selects the data records and uploads the data with “Upload selected”. In the background the GUI automatically creates a CSV upload file and submits the file to CUE for validation. In case the user added data records for different MICs (or Participant IDs or Environments) the GUI automatically creates one file per MIC (or Participant ID or Environment). The file name(s) is displayed in the view after submission (please refer to chapter 4.3.2 for more information on the naming convention).

Please note that entries, which are not submitted by the trading day’s cut-off time 23:30 CET will be removed from the eForm.

Figure 17: eForm Short Code ID - data submission

The upload file(s) is displayed in the Inbox. The files generated from the eForm are named “eForm\_HHMM.csv” in column “Uploaded File”. This includes the timestamp of submission of the records for traceable action.

The preliminary validation results of CUE are provided back to the user as described in chapter 4.1. Please note that the final validation is processed in the intraday and overnight batches and provided in the error report TR160 and the valid registrations are provided in the overview report TR161.

Figure 18: eForm Short Code ID - submitted files in the Inbox

## 4.4.2 Submission process Algo ID

### 4.4.2.1 eForm data entry

In section “eForm Algo ID” the user can fill in Algo ID data with “Add new”:

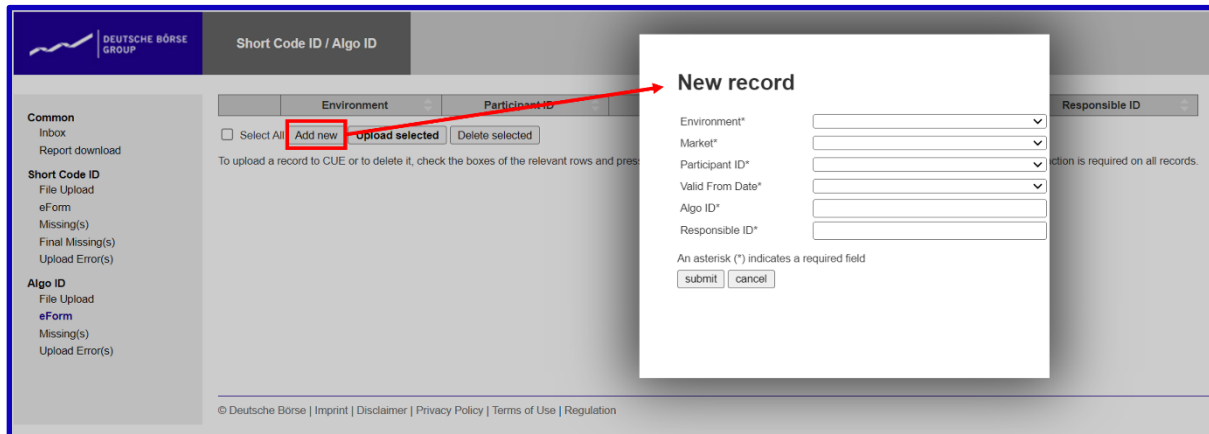

Figure 19: eForm Algo ID - new record

- **Environment:** “SIMU” for the simulation environment and “PROD” for the production environment.
- **Market:** Available MIC codes depend on member data and Participant ID admission.
- **Participant ID:** Available Participant IDs depend on member data and Participant ID admission.
- **Valid From Date:** The Valid From Date can be t or t+1.
- **Algo ID:** A valid numerical Algo ID must be added.
- **Responsible ID:** A valid email address must be added.

For a comprehensive description of data structure and field population, please refer to the “SCLC 2.0 - Reporting handbook for audit trail and other regulatory reporting under the MiFID II / MiFIR regime – Version 4.2”. Please find the link to the document in the “Link to documents” or under the following paths:

- Xetra.com > Newsroom > Current regulatory topics > MiFID II and MiFIR > Reference data reporting
- Eurex.com > Rules & Regs > MiFID II / MiFIR > Client & member reference data

Once the data record is complete the user clicks on “Submit” and the data is pre-validated.

### Failed validation

Failed validation of data is displayed in the “new record form” and marked red.

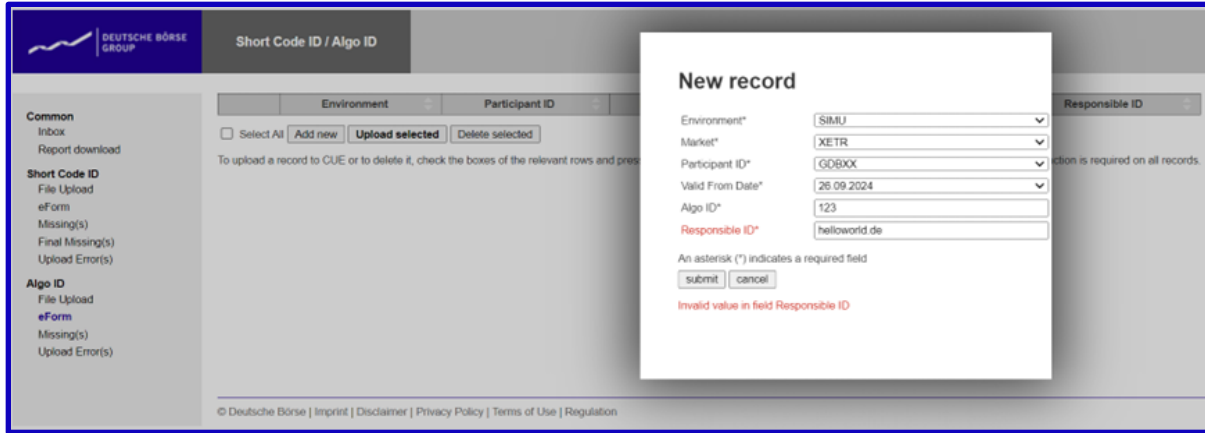

Figure 20: eForm Algo ID - failed validation

### Successful validation

Successfully pre-validated data records are displayed and can also be modified if needed. Please note that the data is not submitted yet. Please refer to chapter 4.4.2.4 for more information.

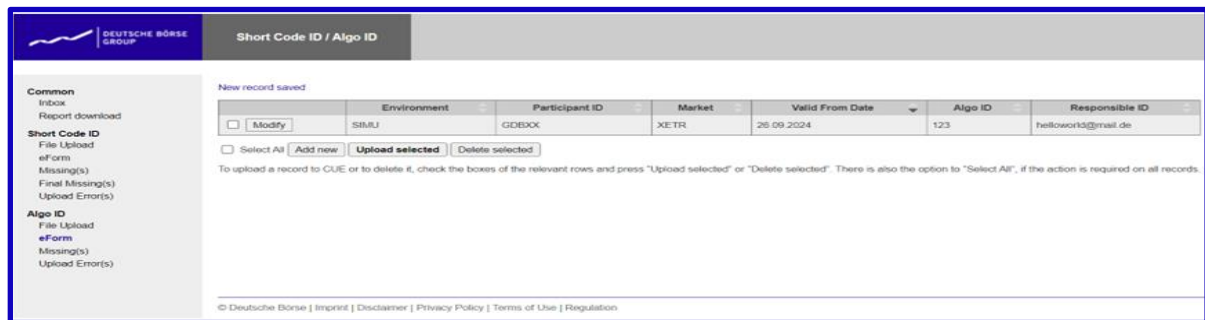

Figure 21: eForm Algo ID - successful validation

#### 4.4.2.2 eForm modification of data entries

In order to modify a data entry, the user clicks on “Modify” and an “Edit record” window opens. The modification can be conducted. The data record can be submitted or the modification can be cancelled.

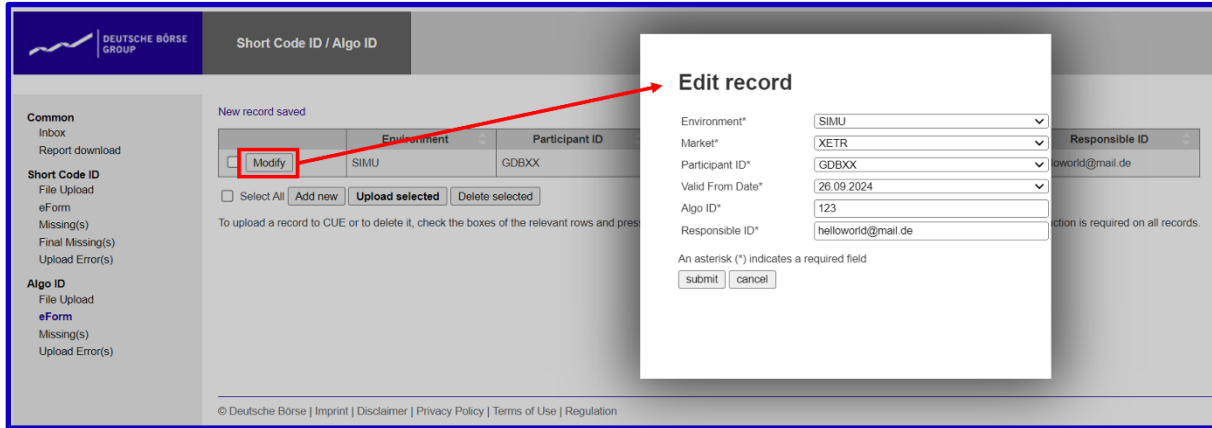

Figure 22: eForm Algo ID - modification

#### 4.4.2.3 eForm deletion of data entries

In order to delete a data entry, the user selects the data record and clicks on “Delete selected” and a window opens for confirmation. The deletion can be conducted or cancelled.

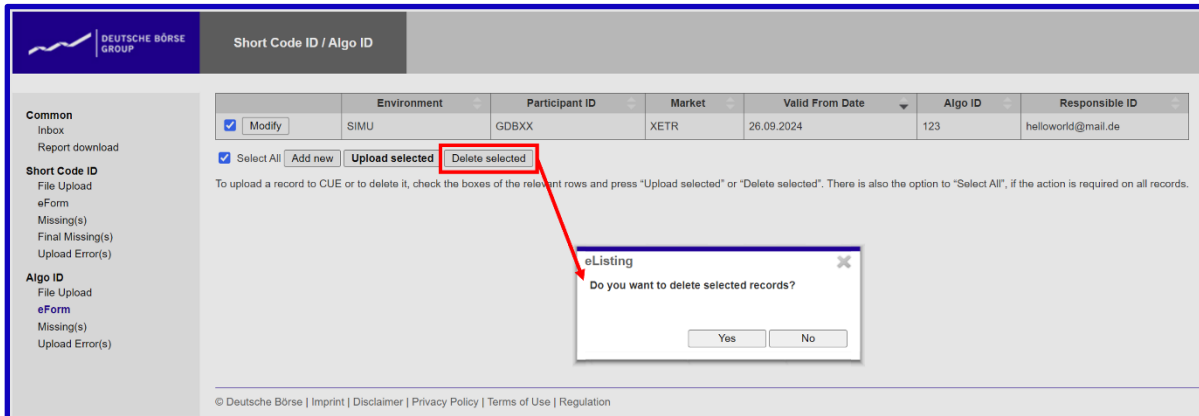

Figure 23: eForm Algo ID - deletion

**4.4.2.4 eForm data submission**

In order to submit the data to the trading venue, the user selects the data records and uploads the data with “Upload selected”. In the background, the GUI automatically creates a CSV upload file and submits the file to CUE for validation. In case the user added data records for different MICs (or Participant IDs or Environments) the GUI automatically creates one file per MIC (or Participant ID or Environment). The file name(s) is displayed in the view after submission (please refer to chapter 4.3.2 for more information on the naming convention).

Please note that entries, which are not submitted by the trading day’s cut-off time 23:30 CET will be removed from the eForm.

Figure 24: eForm Algo ID - data submission

The upload file(s) is displayed in the inbox. The files generated from the eForm are named “eForm\_HHMM.csv” in column “Uploaded File”. This includes the timestamp of submission of the records for traceable action.

The preliminary validation results of CUE are provided back to the user as described in chapter 4.1. Please note that the final validation is processed in the intraday and overnight batches and provided in the error report TR162 and the valid registrations are provided in the overview report TR163.

Figure 25: eForm Algo ID - submitted files in the Inbox

## 4.5 Missing(s)

### 4.5.1 Missing(s) – Short Code ID

In this section users are provided with the missing Short Codes, i.e. “Error 1 – Short Code ID registration is missing” of the last business day (TR160 EOD report) and the current business day (TR160 latest available intraday report). A Short Code can appear twice, if it was identified as missing on the past trading day and again on the current trading day.

The user can start the eForm directly from the Missing(s) overview by clicking on “eForm”. The eForm is prefilled with the following information: Environment, MIC, Participant ID and Short Code ID. Next to the „eForm“ button is a small green tick box located, which indicates that the eForm was used for this record. The user can click the eForm again and fill it again in case the record was rejected (see chapter 4.7).

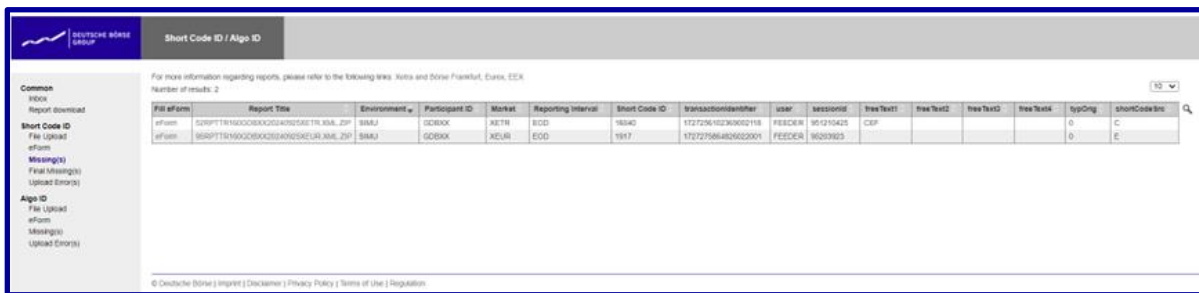

Figure 26: Missing(s) - Short Code ID

### 4.5.2 Missing(s) – Algo ID

In this section users are provided with the missing Algo IDs, i.e. “Error 1 – Algo ID registration is missing” of the last business day (TR162 EOD report) and the current business day (TR162 latest available intraday report). A Algo ID can appear twice, if it was identified as missing on the past trading day and again on the current trading day.

The user can start the eForm directly from the Missing(s) overview by clicking on “Open eForm”. The eForm is prefilled with the following information: Environment, MIC, Participant ID and Algo ID. Next to the „eForm“ button is a small green tick box located, which indicates that the eForm was used for this record. The user can click the eForm again and fill it again in case the record was rejected.

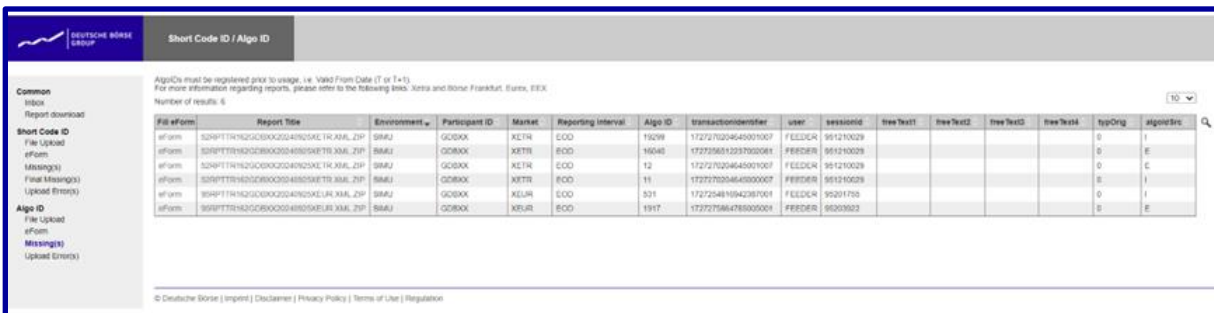

Figure 27: Missing(s) - Algo ID

### 4.6 Final Missing(s) - Short Code ID

In this section users are provided with the final missing Short Codes of the latest EOD TR169 report. A Short Code can appear multiple times, if it was identified as final missing on numerous trading days.

The user can start the eForm directly from the final missing(s) overview by clicking on “Open eForm”. The eForm is prefilled with the following information: Environment, MIC, Participant ID and Short Code ID. Next to the „eForm“ button is a small green tick box located, which indicates that the eForm was used for this record. The user can click the eForm again and fill it again in case the record was rejected.

### 4.7 Upload error(s)

#### 4.7.1 Upload error(s) - Short Code ID

In this section users are provided with the upload errors of their Short Code ID upload file(s) of the last business day (TR160 EOD report) and the current business day (TR160 latest available intraday report). A Short Code can appear multiple times, if multiple errors occurred for a Short Code ID.

Figure 30: Upload error(s) - Algo ID

## 5 Cut-off time and service availability

For Short Code ID and Algo ID uploads the trading day’s cut-off time is 23:30 CE(S)T. Files uploaded by then are processed in the overnight batch. The upload functionality is disabled between 23:30 and 00:00 CE(S)T and the following message is provided to the user for upload attempts during this time:

The CUE system is currently unavailable, please use the upload functionality between 00:00 - 23:30 CET.

Environment\*  
SIMU

Market\*  
XETR

Participant ID\*  
GDBXX

Required upload filename: 89EXTREFDAGDBXX0240927XETR.CSV  
Your document will be automatically renamed to adhere to the CUE naming convention.

Choose File 88EXTALG...RAGUI.CSV

## 6 Contact and support

For technical support please contact the Customer Technical Support (CTS), which is available 24/5, from Monday 00:00 to Friday 22:00 CET:

- Technical Key Account Manager (TKAM) via dedicated phone number
- CTS via hotline +49 69 211 10 888 or by email at [cts@deutsche-boerse.com](mailto:cts@deutsche-boerse.com)

For functional support please contact the Regulatory Reporting Analysts, which are available from Monday to Friday between 9:00 and 18:00 CET:

- Regulatory Reporting Analyst via hotline +49 69 211 28991 or by email at [client.services@deutsche-boerse.com](mailto:client.services@deutsche-boerse.com)

GUI users can tick the box “Allow Support Access” to enable their Regulatory Reporting Analyst to assist whilst using the GUI in a live session.

The screenshot shows the 'Short Code ID / Algo ID' upload interface. It features a table with columns: Status, Pre-Validation Result, Environment, Participant ID, File Type, Market, Upload Date, Transmitted File, and Uploaded File. Below the table, there is a checkbox labeled 'Allow Support Access' which is checked. A note below the checkbox states: 'Please note: The Inbox shows the uploaded files for the last 10 trading days'. The footer contains copyright information for Deutsche Börse and links to Imprint, Disclaimer, Privacy Policy, Terms of Use, and Regulation.

## 7 Link to documents

Additional support and resources are offered via “Link to documents” feature. This link directs you to a webpage where you can access a wide range of guidelines and documents related to the Short Code ID and Algo ID solutions. This serves as a central repository of information and includes the latest updates regarding upload file structures, file population and other relevant information.
